# TABLE OF CONTENTS

| | Page |
|---|---|
| **DEFINITIONS AND FORMULAS** | vi |
| **POPULATION** | 1 |
| July 1, 1988 estimates and April 1, 1980 census of population of States | 2 |
| July 1, 1984-1987 estimates and April 1, 1980 census of population, 1985 estimates of per capita income *(Idaho districts and counties)* | 3 |
| Percent change, 1980-1987, Idaho counties *(map)* | 4 |
| July 1, 1986 estimates of population and 1985 estimates of per capita income *(Idaho cities)* | 5 |
| April 1, 1980 census of population by age and sex *(Idaho districts, counties)* | 8 |
| July 1, 1987 estimate of population of Idaho, by age and sex | 12 |
| **TRENDS AND SUMMARY** | 13 |
| Trends of Idaho vital events | 13 |
| Vital statistics, 1979-1988 | 15 |
| Summary of 1988 vital statistics *(districts, counties)* | 17 |
| Summary of 1988 infant, fetal, perinatal mortality *(districts, counties)* | 18 |
| **NATALITY** | 19 |
| Live births and rates, 1984-1988 *(districts, counties)* | 21 |
| 1988 Live births: sex and race *(districts, counties)* | 22 |
| 1988 Live births: age of mother *(districts, counties)* | 23 |
| 1988 Live births: attendant at birth *(districts, counties)* | 24 |
| 1988 Live births: place of birth *(districts, counties)* | 25 |
| 1988 Live births: birth and fertility rates *(U.S., Idaho, districts, counties)* | 26 |
| 1988 Live births: live birth order by age of mother | 27 |
| 1988 Live births: age-specific fertility rates *(U.S., Idaho)* | 27 |
| 1988 Live births: trimester prenatal care began *(districts, counties)* | 28 |
| 1988 Live births: education of mother *(districts, counties)* | 29 |
| 1988 Live births: prenatal care by education of mother | 30 |
| 1988 Live births: complications and malformations | 31 |
| 1988 Live births: APGAR scores | 31 |
| 1988 Immature live births: race of mother *(districts, counties)* | 32 |
| 1988 Immature live births: age of mother *(districts, counties)* | 33 |
| 1988 Immature live births: live birth order by age of mother | 34 |
| 1988 Immature live births: age-specific immaturity rates | 34 |
| 1988 Immature live births by weight categories *(districts, counties)* | 35 |
| Out-of-wedlock live births | 36 |
| 1988 Out-of-wedlock live births: race of mother *(districts, counties)* | 38 |
| 1988 Out-of-wedlock live births: age of mother *(districts, counties)* | 39 |
| 1988 Out-of-wedlock live births: live birth order by age of mother | 40 |
| 1988 Out-of-wedlock live births: age-specific ratios | 40 |
| Most common given names, 1984-1988 | 41 |
| **MORTALITY** | 43 |
| Deaths and rates, 1984-1988 *(districts, counties)* | 45 |
| 1988 Deaths: sex and race *(districts, counties)* | 46 |
| 1988 Deaths: age at death *(districts, counties)* | 47 |
| 1988 Deaths: ten leading causes, by sex *(U.S., Idaho)* | 48 |
| 1988 Deaths: ten leading causes by age group | 49 |
| 1988 Deaths: malignant neoplasms by site | 53 |
| 1988 Deaths: selected causes *(U.S., Idaho, districts, counties)* | 54 |
| 1988 Accidental deaths occurring in Idaho: category by age | 56 |
| Infant, fetal, maternal mortality | 58 |

Infant deaths and rates, 1984-1988 *(districts, counties)* ..... 60
1988 Infant deaths: sex and race *(districts, counties)* ..... 61
1988 Infant deaths: causes of death, neonatal and postneonatal ..... 62
1988 Infant deaths: causes of death *(districts, counties)* ..... 63
1988 Infant deaths: neonatal, postneonatal *(districts, counties)* ..... 64
Stillbirths and ratios, 1984-1988 ..... 65
Perinatal deaths and ratios, 1984-1988 *(districts, counties)* ..... 66
Infant and perinatal mortality: five-year 1984-1988 totals and rates/ratios *(districts, counties)* ..... 67
1988 Reported morbidity from selected diseases *(districts, counties)* ..... 68
Reported morbidity from selected diseases, 1984-1988 ..... 70

**INDUCED ABORTION** ..... 71
Induced abortions in Idaho, 1980-1988 *(counties)* ..... 71
1988 Induced abortions in Idaho and to Idaho residents *(districts, counties)* ..... 72
1988 Induced abortions to Idaho residents: ratios and race *(districts, counties)* ..... 73
1988 Induced abortions to Idaho residents: age of patient *(districts, counties)* ..... 74
1988 Induced abortions in Idaho: procedure by gestation ..... 75
1988 Induced abortions in Idaho: complications by procedure ..... 75
1988 Induced abortions in Idaho: age of patient by marital status ..... 76
1988 Induced abortions in Idaho: previous abortions, living children ..... 76

**MARRIAGE AND DIVORCE** ..... 77
Marriages, 1979-1988 *(districts, counties)* ..... 78
1988 Marriages: age of bride by age of groom ..... 79
1988 Marriages: race of bride by race of groom ..... 79
1988 Marriages: age of bride by marital status ..... 80
1988 Marriages: age of groom by marital status ..... 81
Divorces, 1979-1988 *(districts, counties)* ..... 82
1988 Divorces: number of children affected ..... 83
1988 Divorces: legal grounds ..... 84
Divorces, 1986-1988: duration of marriage ..... 85

**APPENDIX** ..... 87
Appendix A: Vital statistics profile of Idaho by district and county ..... 87
Appendix B: Detailed causes of death by age ..... 94

# CREDITS

Afro-Americans have been an almost invisible minority in accounts of Idaho life and history. Yet they have been a vital part of the Idaho scene since the earliest arrival of explorers from the young United States. A black named York traveled through Idaho as a member of the Lewis and Clark expedition in 1805. Black trappers and fur traders arrived in the 1840s; black miners and cowboys in the 1860s and 1870s; black homesteaders and urbanites in succeeding decades. In more recent times, blacks have overcome racism and limited resources to become leading government officials, businesspeople, university professors, ministers, social activists, farmers, entertainers, lawyers, soldiers, and athletes.

Afro-American population in Idaho has risen from a few dozen in early territorial days to nearly 3,000 today. Though their story is only beginning to be told, it is plain that blacks are a part of what Idaho is — past, present and future.

**Dr. Mamie Oates Oliver**

We are deeply indebted to Dr. Mamie Oates Oliver for her invaluable contributions to the publication of this report. All of the narrative and accompanying layout design on the covers and divider pages are courtesy of Dr. Oliver.

Dr. Oliver, who was previously a professor of social work at Boise State University, is currently teaching in Providence, Rhode Island, where her husband is pastoring an American Baptist church. She still retains an unbridled enthusiasm for the State of Idaho and the role of Afro-Americans in molding the state's history. "Idaho is a part of what America is," she explains, "and black American people are a part of what **all** humanity is."

Throughout her distinguished career, Dr. Oliver has been involved in over 30 years of professional and public service in such diverse areas as program development, city planning, community organizational development, public relations, grant writing, and counseling. She has also conducted numerous workshops and seminars across the country. Among her many awards and honors are: 1) recognition as a Distinguished Citizen by the **Idaho Statesman,** 2) recognition as one of Ten Outstanding Women in Idaho by the Boise March of Dimes, and 3) recipient of the 1988 Jefferson Award for Outstanding Public Services Benefitting Local Communities by the American Institute for Public Services.

Dr. Oliver is continuing her work about the history of Afro-Americans in Idaho: a multi-volume project, **Idaho Ebony** will cover the overall black history of Idaho, as well as highlight the roles of key families and women in forming the mosaic of Idaho's past.

In this centennial year, the staff of the Cooperative Center for Health Statistics recognizes the important contributions of our black citizens and thanks Dr. Oliver for her contributions to this report.

# DEFINITIONS AND FORMULAS

RESIDENCE DATA — data allocated by place of residence of the decedent (deaths), or by place of residence of the child's mother (births, stillbirths).

OCCURRENCE DATA — data allocated by place where event occurred, regardless of the person's place of residence (marriages, divorces).

LIVE BIRTH — a birth that shows any sign of life after delivery.

(CRUDE) BIRTH RATE — number of live births per 1,000 population.

$$\left(\frac{\text{live births}}{\text{population}} \times 1{,}000\right)$$

FERTILITY RATE — number of live births per 1,000 women 15-44 years of age.

$$\left(\frac{\text{live births}}{\text{females 15-44}} \times 1{,}000\right)$$

OUT-OF-WEDLOCK RATIO — number of out-of-wedlock live births per 1,000 live births.

$$\left(\frac{\text{out-of-wedlock live births}}{\text{live births}} \times 1{,}000\right)$$

IMMATURE BIRTH — a live birth weighing under 2500 grams (5½ pounds or less).

IMMATURE BIRTH RATE — number of immature live births per 1,000 live births.

$$\left(\frac{\text{immature live births}}{\text{live births}} \times 1{,}000\right)$$

STILLBIRTH — a spontaneous fetal death of at least 20 weeks gestation or a weight of at least 350 grams (does not include any induced abortions).

STILLBIRTH RATIO — number of stillbirths per 1,000 live births.

$$\left(\frac{\text{stillbirths}}{\text{live births}} \times 1{,}000\right)$$

INFANT DEATH — death of an infant under one year of age.

INFANT DEATH RATE — number of infant deaths per 1,000 live births.

$$\left(\frac{\text{infant deaths}}{\text{live births}} \times 1{,}000\right)$$

NEONATAL DEATH — death of an infant within the first 27 days of life.

NEONATAL DEATH RATE — number of neonatal deaths per 1,000 live births.

$$\left(\frac{\text{neonatal deaths}}{\text{live births}} \times 1{,}000\right)$$

PERINATAL DEATH — includes stillbirths and deaths to infants within the first six days of life.

PERINATAL DEATH RATIO — number of perinatal deaths per 1,000 live births.

$$\left(\frac{\text{perinatal deaths}}{\text{live births}} \times 1{,}000\right)$$

MATERNAL DEATH — death attributable to complications of pregnancy, childbirth, or the puerperium.

MATERNAL DEATH RATE — number of maternal deaths per 10,000 live births.

$$\left(\frac{\text{maternal deaths}}{\text{live births}} \times 10{,}000\right)$$

(CRUDE) DEATH RATE — number of deaths per 1,000 population.

$$\left(\frac{\text{deaths}}{\text{population}} \times 1{,}000\right)$$

CAUSE-SPECIFIC DEATH RATE — number of deaths from a specific cause per 100,000 population.

$$\left(\frac{\text{deaths from specific cause}}{\text{population}} \times 100{,}000\right)$$

# Population

The black presence in Idaho started small — just 60 "free colored" men and women were recorded by the territorial census in 1870. But Idaho's black population slowly grew over the years, especially in the state's urban areas; the U.S. Census counted 2,716 blacks in Idaho in 1980.

# POPULATION

Each year, the population estimates for Idaho are made available by the Federal-State Cooperative Program for Local Population Estimates. At press time, however, 1988 county estimates were not yet available. **Therefore, all county vital rates are based on provisional 1987 estimates. The 1988 State provisional estimate is available (1,003,000) and is used as the basis for State rates.** Included in this section are revised county estimates for 1984-86, provisional 1987 county estimates, and state estimates for 1988.

Since the 1980 census, Idaho's population has grown by 6.2% to 1,003,000 (provisional) as of July 1, 1988; however, during this same time period, Idaho experienced a net out-migration of 3.3%. The chart on the following page shows that Idaho has been near the median of growth since 1980: Idaho was 22nd on the list of fastest growing states. In the Mountain and Pacific regions, only Montana, Oregon and Wyoming have experienced slower rates of increase than has Idaho. Nevada had the highest growth rate (30.5%) in the nation for the same period (1980-88). For the most part, states experiencing the most rapid rate of growth are in the west and southern Atlantic areas.

In Idaho, the fastest growing areas from 1980-87 (county estimates are not yet available for 1988) were District 4 (central Idaho), with a growth rate of 12.1%, and District 7 (northeast), which increased by 8.1%. All other districts experienced a decline between 1986 and 1987. District 2 (north central) has experienced a 0.7% loss since 1980.

At the county level, the fastest growing county since 1980 was Blaine, with a growth rate of 39.9%; Custer County was second with a growth rate of 35.1%, although it has been declining since 1985. Seventeen counties have lost population since 1980; Shoshone and Camas Counties had the highest rates of loss of -22.8% and -19.4%, respectively.

The largest numerical increase occurred in Ada County (26,600), followed by Kootenai and Canyon Counties with increases of 7,600 and 6,800, respectively. Shoshone County lost the most numerically (-4,400).

Also in this issue are July 1, 1987 age and sex estimates for Idaho, the latest population estimates for Idaho cities as of July 1, 1986, and the 1985 per capita income estimates for counties and cities.

The highest per capita incomes were in Blaine ($11,374), Ada ($10,710) and Nez Perce ($9,575) Counties, while those counties with the lowest income were Owyhee ($4,827), Clark ($5,052) and Madison ($5,566). The highest city was Sun Valley ($25,275); the lowest Grand View ($3,923).

# ESTIMATES OF THE RESIDENT POPULATION OF STATES

## July 1, 1988

## Components of Change Since 1980

(In thousands. Includes Armed Forces residing in each State. Percentages based on 1980 population.)

| REGION, DIVISION AND STATE | July 1, 1988 (Provisional) | July 1, 1987 (Revised) | April 1, 1980 (Census) | CHANGE, 1980-88 | | COMPONENTS OF CHANGE | | | |
|---|---|---|---|---|---|---|---|---|---|
| | | | | | | | | Net Migration | |
| | | | | Number | Percent | Births | Deaths | Number | Percent |

# Trends and Summary

Vina Moulton

Nellie Allen

University of Idaho Class of 1899 (with Jennie Hughes)

**Top left photo:** "Aunt Vina" Moulton, ex-slave, laundress, charter member of the First Presbyterian Church of Boise. She arrived in Boise in 1867, having walked barefoot part of the way from Missouri.

**Top right photo:** Nellie Gillenwater Allen, an African-born ex-slave, presiding at her 100th birthday celebration in Boise a number of years ago.

**Bottom photo:** Jennie Hughes, the University of Idaho's first black graduate and winner of the prestigious Watkins Medal for Oratory. A member of many clubs and organizations, she received her Bachelor of Science degree in 1899.

# TRENDS IN IDAHO

BIRTHS ..... Idaho's birth rate continues a remarkable decline: at 15.7, it stands at the lowest level ever recorded, and for the first time is lower than the U.S. rate (15.9). The number of births has also declined, and is at its lowest point since 1974, even though the population has grown considerably since then. In 1988, 15,732 births occurred to Idaho mothers, a decrease from 1987 of 1%.

OUT-OF-WEDLOCK BIRTHS ... Out-of-wedlock births continued to increase in 1988: at 2,196 (139.6 per 1,000 live births), it is once again both the highest ratio and highest number of out-of-wedlock births ever recorded in Idaho. The increase over 1987 data was spread across all age groups. District 3 recorded the highest ratio: at 195.9, it was 40% above the state level.

DEATHS ..... The number of Idaho deaths increased 5% in 1988 to 7,654. The rate of death has ceased the downward trend in evidence during the sixties and seventies. It had fluctuated between 7.1 and 7.3 since 1978, but in 1988, the death rate was 7.6, the highest rate since 1976.

STILLBIRTHS ..... Both the number and ratio of stillbirths change little from year to year, although a general decline has been evident over the last several years. In 1988, 98 stillbirths occurred for a ratio of 6.2 per 1,000 live births, a slight increase over the 1987 ratio of 6.0.

INFANT DEATHS ..... Infant deaths are also subject to fluctuations because of the small data base. Infant mortality in Idaho declined considerably in the early to mid-70's, but the eighties saw little overall change until 1987 when the number dropped to 158 (9.9). In 1988, infant deaths totaled 139 (8.8). Neonatal mortality dipped to its lowest level ever (3.8), but postneonatal deaths increased to 5.1.

MATERNAL DEATHS ..... One Idaho resident died from complications related to childbirth in 1988 (0.6 per 10,000 live births).

MARRIAGES ..... After six consecutive years of decline, both the number and rate of Idaho marriages increased in 1988, from 11,428 (11.4) in 1987 to 12,165 (12.1) in 1988. However, both the number and rate are still the third-lowest ever recorded.

DIVORCES ..... After six years of annual decreases, the number of divorces in Idaho has also seen an increase in both number and rate in 1988, up from 5,892 (15.9) in 1987 to 5,987 (6.0) in 1988. But the number and rate of divorce in 1988 are still the second-lowest on record in Idaho.

# NATALITY

Two percent more infants were born in the United States in 1988 than in 1987. At 3,913,000, this is the highest number of births since 1964. The birth rate of 15.9 was 1% higher than the 1987 rate of 15.7. The fertility rate of 67.3 (the number of births per 1,000 women 15-44 years of age) was 2% higher than in 1987 (66.1). According to the National Center for Health Statistics, the increase in the number of live births was due to both a higher fertility rate and a higher number of women in the childbearing ages.

For the first time, Idaho's birth rate (15.7) was lower than the U.S. (15.9); the number of Idaho live births fell 1% from 15,926 to 15,732, while the birth rate was also down by 1% to 15.7. Since 1979, Idaho's birth rate has declined a remarkable 29%. Idaho's 1988 provisional fertility rate was 67.8 live births per 1,000 women 15-44 years of age, a 1% decrease from 68.6 in 1987. In comparison, the 1988 national rate was 67.3. Idaho's birth and fertility rates have historically been much higher than the U.S. rates, but the diminishing difference is remarkable: in 1979, Idaho's fertility rate was 43% higher; by 1988, there was virtually no difference, a fairly rapid and complete turnaround.

Birth rates in Idaho in 1988 ranged from a low of 12.3 in District 2 to a high of 19.1 in District 7. Birth rates increased in only one district: District 1 rose slightly from 13.2 in 1987 to 13.7 in 1988. The districts do not vary widely in comparison to each other from year to year, in that areas in the northern, southwestern and southern parts of Idaho traditionally experience much lower birth rates than the southeastern areas, but the general trend continues to be downward.

Four percent of Idaho's 1988 births occurred in a nonhospital setting (compared to 3% in 1987), of which 61% were at home. Nearly all the remainder of nonhospital births were in birthing centers or physicians' clinics. Home births occurred most frequently in District 4, a change from past years in which Districts 1 and 5 experienced the highest numbers of home births; all but one of the birthing center and clinic births were in Districts 3 and 4.

Lay midwives and naturopaths were the most popular alternatives for those mothers who did not choose a physician-attended birth. The districts vary distinctly in this area, as shown on page 24.

# OUT-OF-WEDLOCK BIRTHS

In spite of a 1% decline in total live births, Idaho out-of-wedlock live births increased 7% in 1988 from 2,059 to 2,196 (the increase was spread over all age groups). The ratio of out-of-wedlock births to total births rose 8% from 129.3 to 139.6 per 1,000. Both number and ratio are the highest ever recorded in Idaho. The 1988 out-of-wedlock ratios increased from 1987 for whites and Japanese; all other racial groups showed a decline from the previous year. During the 1985-1988 period, all but blacks and American Indians recorded increasing ratios (see below).

IDAHO RACE-SPECIFIC RATIOS

| | 1988 | 1987 | 1986 | 1985 | Change 1985-88 |
|---|---|---|---|---|---|
| White | 135.7 | 124.6 | 113.9 | 101.7 | +33.4% |
| Black | 150.0 | 176.5 | 166.7 | 250.0 | -40.0 |
| American Indian | 381.9 | 395.2 | 372.4 | 390.7 | - 2.3 |
| Japanese | 114.3 | 52.6 | 50.0 | 31.3 | +265.2 |
| Other nonwhite | 83.3 | 90.9 | 85.3 | 72.6 | +14.7 |
| Spanish surname* | 232.0 | 199.0 | 166.3 | 180.1 | +28.8 |

The national out-of-wedlock live birth ratio increased in 1986 (the latest data available) to 233.9; this reflects higher ratios for both whites and nonwhites. The U.S. ratio is 68% higher than Idaho's, although the differential varies by race: national white ratios are only 16% higher, whereas nonwhite ratios are 101% higher than Idaho's.

| | Total | White | Nonwhite | | Spanish Surname* |
|---|---|---|---|---|---|
| | | | Total | Black | |
| U. S. (1986) | 233.9 | 157.1 | 523.7 | 612.1 | N.A. |
| Idaho (1988) | 139.6 | 135.7 | 260.6 | 150.0 | 232.0 |

When comparing U.S. and Idaho ratios, one should keep in mind several influencing factors:

1. Idaho has historically had a higher birth rate than the nation as a whole; since live births provide the base (denominator) for computing out-of-wedlock ratios, the higher the number of births, the lower the ratio. However, the differential between the two birth rates has now disappeared, so this is no longer a factor.
2. Idaho has a small nonwhite population; their higher out-of-wedlock ratios have less effect on the overall ratio.
3. The U.S. ratios shown above lag two years behind Idaho's; undoubtedly the 1988 U.S. ratios will be even higher than in 1986.
4. Idaho has a relatively small data base, so some fluctuation is not unexpected.

District 3 again had the highest out-of-wedlock ratio (195.9), in 1988: nearly one of five infants were born out-of-wedlock. District 1 (185.8) and District 5 (146.9) were the next-highest districts. Shoshone (264.5), Benewah (239.7) and Canyon (213.0) Counties had the highest county ratios.

# MOST COMMON GIVEN NAMES

## 1984 - 1988

| GIRLS | | |
|---|---|---|
| 1988 | 1986 | 1984 |
| 1. Jessica | 1. Jessica | 1. Jennifer |
| 2. Ashley | 2. Ashley | 2. Jessica |
| 3. Amanda | 3. Sarah | 3. Sarah |
| 4. Sarah | 4. Amanda | 4. Amanda |
| 5. Brittany | 5. Jennifer | 5. Ashley |
| 6. Megan | 6. Megan | 6. Megan |
| 7. Jennifer | 7. Brittany | 7. Stephanie |
| 8. Stephanie | 8. Amber | 8. Melissa |
| 9. Heather | 9. Stephanie | 9. Crystal |
| 10. Chelsea | 10. Nicole | 10. (tie) Nicole<br>Lindsey |

| BOYS | | |
|---|---|---|
| 1988 | 1986 | 1984 |
| 1. Michael | 1. Michael | 1. Michael |
| 2. Joshua | 2. Christopher | 2. Matthew |
| 3. Matthew | 3. Matthew | 3. Joshua |
| 4. Christopher | 4. Joshua | 4. Christopher |
| 5. Jacob | 5. David | 5. Ryan |
| 6. Andrew | 6. Daniel | 6. Daniel |
| 7. David | 7. Andrew | 7. David |
| 8. Daniel | 8. Robert | 8. Justin |
| 9. Justin | 9. Jacob | 9. James |
| 10. Ryan | 10. Ryan | 10. (tie) Brian<br>Robert |

*(Names include variations in spelling.)*

### Unique Female Names:

Many are attributes: Somber, Dazzlin, Heavenly, Whisper, Traditional, Shy, Truly, Purity; others seem to lean toward a culinary taste: Cinamon, Cocoa, Dakri, Zinfandel. Still others are a unique spelling of a common name, or simply a totally different name: Sioux, Porsha, Sonamarivell, Paijrianne.

### Unique Male Names:

Most unique male names tend toward the bold: Saber, Blaze, Slade, Tyger, Quest, Noble, Attila, Rowdy, Stetson; others are simply unusual: Zenon, Rikirangi, Lutheran.

# Mortality

*In Memory of*
DR. ALEXANDER J. FOSTER

*Date of Birth*
January 15, 1883 Milledgeville, Ga.

*Entered Into Rest*
September 8, 1958 Boise, Idaho

*Services at*
DICKARD-EDMUNDS CHAPEL
September 10, 1958 — 10:00 A.M.

*Officiating*
Rev. Paul Beresford - Chaplain J. E. Frazee

*Sacred Music*
Organist ---------- Fern Nolte Davidson
Vocalist ---------- Mrs. Leona Horton
"Just A Closer Walk"
"Abide With Me"

*Casket Bearers*
Merle Bright Ben Gottier
Carl Winterfeld William Pechanec
Jake Martell Lewis Dewey

*Concluding Rites*
Field of Honor
Morris Hill Cemetery
Boise, Idaho

AS PART OF OUR SERVICE...

Dr. Foster was a podiatrist who practiced in many cities in Idaho, including Nampa, Idaho Falls, and Twin Falls. One son, Fraser (front left, family photograph), attended Nampa High School.

Dr. Alexander J. Foster (standing, back right), his wife, children, and unknown relative.

Dr. Foster in his office.

Although black mortality rates have historically been higher than those for whites, blacks use funeral ceremonies as occasions to reaffirm life, family and community.

# MORTALITY

The number of Idaho deaths increased 5% to 7,654 in 1988, up from 7,305 in 1987. The rate of death rose 4% to 7.6, the highest death rate since 1976. The U.S. death rate was 8.8 in 1988, just 1% over 1987. Comparing the national death rate with Idaho's reveals that Idaho rates have historically been lower. Age-adjusted rates* show that even allowing for the differing age structures (Idaho's population is younger), Idaho's death rate is below that of the nation.

The five leading causes of death are: (1) Heart disease, (2) Malignant neoplasms, (3) Cerebrovascular disease, (4) Accidents and (5) Chronic obstructive pulmonary disease (COPD). (COPD was not listed as a single cause prior to 1984; it consists of ICD-9 codes 490-496, and includes, but is not limited to, the Bronchitis, emphysema and asthma category previously used.) The leading eight causes are the same for both the U.S. and Idaho; some minor differences exist in the remaining causes (rates are deaths per 100,000 population):

| Causes ranked 6-10 in U.S. | Rank in Idaho |
|---|---|
| 6. Pneumonia and influenza (31.4) | 6 (34.4) |
| 7. Diabetes mellitus (16.1) | 7 (16.5) |
| 8. Suicide (11.8) | 8 (16.2) |
| 9. Chronic liver disease and cirrhosis (10.6) | 11 (6.2) |
| 10. Atherosclerosis (9.6) | 9 (9.0) |

Of the ten leading causes of death in Idaho in 1988, rates increased for all causes except Suicide. The largest increase occurred in Pneumonia and influenza, the result of an outbreak of influenza that occurred in early 1988. Although deaths from motor vehicle accidents declined, deaths from all other accidents experienced a sharp increase that more than compensated for the small decline in motor vehicle deaths, leading to a higher accidental death rate. The tenth leading cause of Idaho deaths was Alzheimer's disease, marking the first time it has been ranked as a leading cause.

When making comparisons of 1979-1987 mortality data with earlier years, one must be aware that the manner of coding the underlying cause of death changed in 1979 to the ninth revision of the **International Classification of Diseases** (ICD-9). The introduction of ICD-9 in all states has resulted in a major reclassification of several causes of death. Therefore, there are major discontinuities in the trends for certain causes of death. (Comparability ratios between ICDA-8 and ICD-9 have been published in the Vital Statistics Summaries, 1979-1982.)

**To eliminate the bias inherent in differing age compositions (an older population has a higher death rate simply because the risk of dying increases as one ages), age-specific death rates can be calculated. These rates are then applied to a standard population, often the U.S. population, and the composite, or "age-adjusted," death rate is then calculated. Five-year average (1982-1986) death rates have been computed for Idaho counties using the 1940 U.S. Census as the standard population. Data are available upon request.*

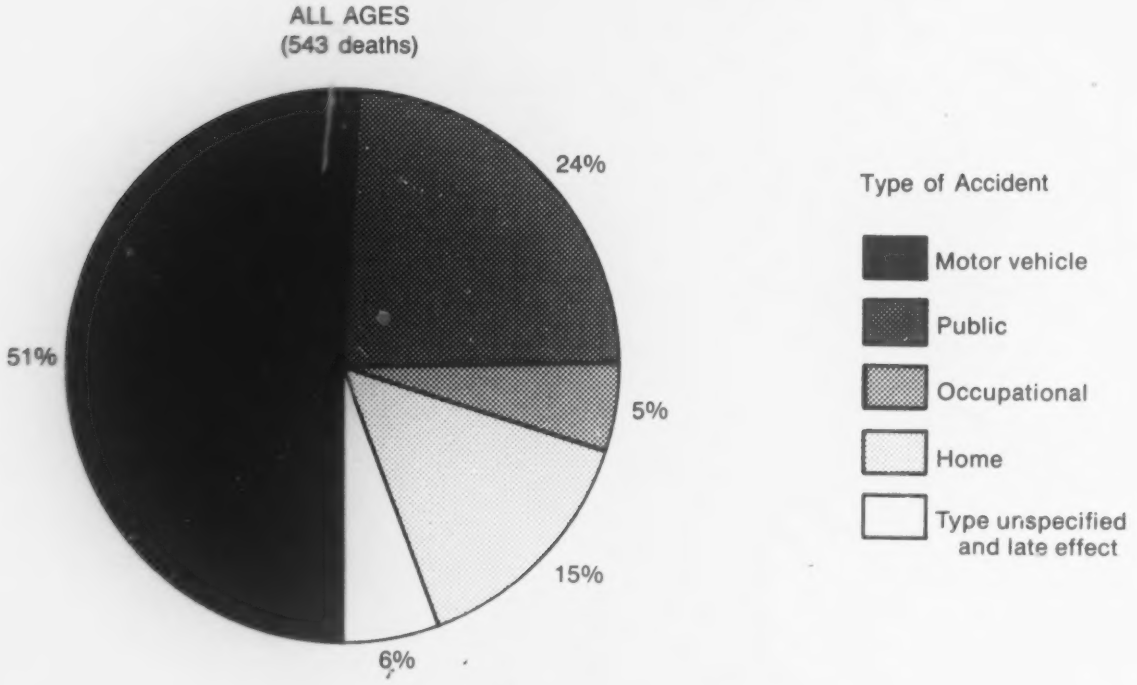
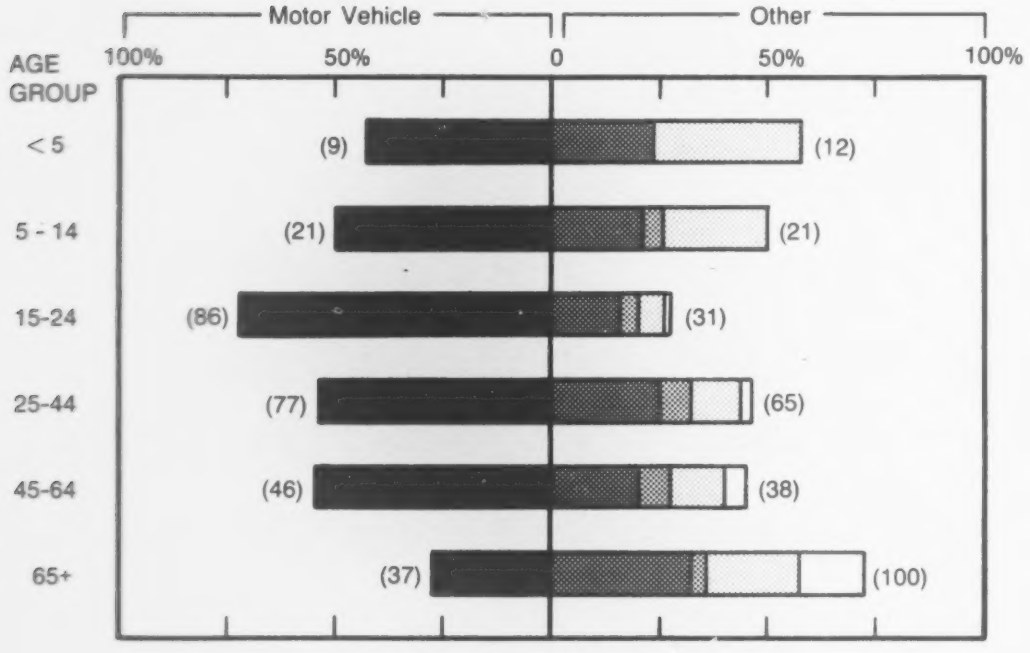
# 1988 ACCIDENTAL DEATHS OCCURRING IN IDAHO

## Age and Category



## CATEGORY BY AGE GROUP



*(Numbers of deaths in parentheses)*

# INFANT, FETAL AND MATERNAL MORTALITY

The number of Idaho resident infant deaths decreased 12% from 158 in 1987 to 139 in 1988. Coupled with only 1% (194) fewer live births, the infant death rate dropped from 9.9 to 8.8 per 1,000 live births. Considering the size of the data base, some fluctuation is not unexpected, as illustrated by the graph on the following page. However, it appears that following some "hesitation" in the eighties, infant mortality in Idaho is again declining. Whether it will continue to do so remains to be seen.

For the first time ever, the neonatal mortality rate was lower than the postneonatal mortality rate. In fact, the decrease in neonatal mortality (from 5.8 in 1987 to 3.8 in 1988) accounted entirely for the decline in overall infant deaths, since postneonatal mortality increased from 4.1 in 1987 to 5.1 in 1988.

Infant mortality in the U.S. continued to decline, dropping from 10.0 in 1987 to 9.9 in 1988. Neonatal deaths decreased from 6.5 to 6.3; postneonatal deaths were up slightly from 3.5 to 3.6 (all 1988 rates provisional). The difference between U.S. and Idaho infant mortality, once substantially in Idaho's favor, has narrowed considerably in the past few years. (See graph on following page.) Although the composition of the rates varies from year to year, the lower Idaho neonatal death rates normally account for its lower overall infant death rates (except for 1986). Idaho's postneonatal deaths are usually higher than national rates; the higher incidence of SIDS in Idaho appears to account for much of that difference.

Districts 2, 4 and 5 recorded lower infant mortality in 1988; rates in Districts 1, 3 and 6 were higher in 1988, while in District 7 there was no change. The highest rate (12.5) was reported by District 3 for the third straight year; the lowest rate (3.6) again occurred in District 2. Neonatal and postneonatal mortality were highest in District 3; both were lowest in District 2.

Because infant and perinatal deaths provide small data bases which tend to fluctuate or produce abnormally high rates in small counties, five-year rates have been calculated. See page 67 for 1984-88 total rates/ratios by district and county for infant (overall, neonatal, and postneonatal) and perinatal mortality.

There was one Idaho maternal death in 1988, a resident of Elmore County (District 4).

The reader is cautioned that the rates in this section are based on a particularly small data base; caution must be exercised when attempting to draw conclusions. See page 67 for a five-year summary of these data.

| ALL OTHER CAUSES | 22 | 1.4 | 3 | 0.2 | 19 | 1.2 | 1.8 |

*< .05/1000 live births.

Sudden Infant Death Syndrome (SIDS) was again the leading cause of infant deaths in Idaho in 1988. The infant death rate in Idaho from SIDS dropped very slightly from 3.2 deaths per 1,000 live births in 1987 to 3.1 in 1988. The national SIDS rate rose slightly from 1.2 to 1.3; Idaho's rate is over twice as high as the U.S. rate. Districts 6 and 3 recorded the highest SIDS rates in 1988.

The leading single cause of neonatal deaths in Idaho was Congenital anomalies (1.5 deaths per 1,000 live births), although more neonatal deaths occurred in the general category, "Other conditions originating in the perinatal period" (which includes such conditions as complications of pregnancy and delivery, infections, etc.). The second-leading single cause was "Disorders relating to short gestation and unspecified low birthweight" (0.3 deaths per 1,000 live births).

In the postneonatal period, SIDS accounted for 59% of the deaths; Idaho's rate of postneonatal deaths from SIDS was 3.0. Congenital anomalies and Accidents were the second-leading causes of postneonatal mortality, with a rate of 0.3 each.

NOTE: Changes in procedures for coding SIDS increased the number of deaths attributable to SIDS after 1985; data may not be entirely comparable to previous years.

# Induced Abortion

The black community has been divided not only on the question of the morality of abortion, but also on its sociopolitical implications. Historically, abortion has not been a strong tradition among blacks, although black women choose abortion as individuals every year.

# INDUCED ABORTIONS

In the United States, approximately 1.3 million legal abortions were reported to the Centers for Disease Control in 1985 (the latest data available). The abortion ratio (reported abortions per 1,000 live births) reached its highest level of 359.2/1,000 in 1980. The abortion ratio increased from 348.7 in 1983 to 364.1 in 1984, but declined again in 1985 to 353.8.

Comparative U.S. and Idaho abortion data are listed below. Both represent occurrence, not residence, data.

| | INDUCED ABORTIONS | RATIO PER 1,000 LIVE BIRTHS | RATE PER 1,000 FEMALES, 15-44 |
|---|---|---|---|
| U.S. (1985)[1] | 1,328,570 | 353.8 | 24 |
| Idaho (1988) | 1,650 | 104.9 | 7 |

The reporting of induced abortions in Idaho was not required until July 1, 1977. The reported numbers increased from 708 during the last half of 1977 to a high at 2,706 in 1981. The number of abortions reported in Idaho in 1988 was 1,650, the lowest annual total since reporting began.

## INDUCED ABORTIONS REPORTED IN IDAHO

## 1980 - 1988

| Valley | - | - | - | - | 2 | 2 | - | 4 | - |

No maternal deaths have yet been reported from Idaho induced abortions.

Residence data are also available and presented in this section. These include Idaho residents who obtained abortions in 1988, regardless of the State of abortion.[2] Tables on pages 72, 73 and 74 reflect residence data; tables on pages 72, 75 and 76 reflect only abortions done in Idaho.

[1]**CDC Surveillance Summaries,** Centers for Disease Control, November, 1988.

[2]These data do not include induced abortions performed in Utah; an exchange of resident reports will begin with 1989 data.

# Marriage & Divorce

Clara and Warner Lewis Terrell

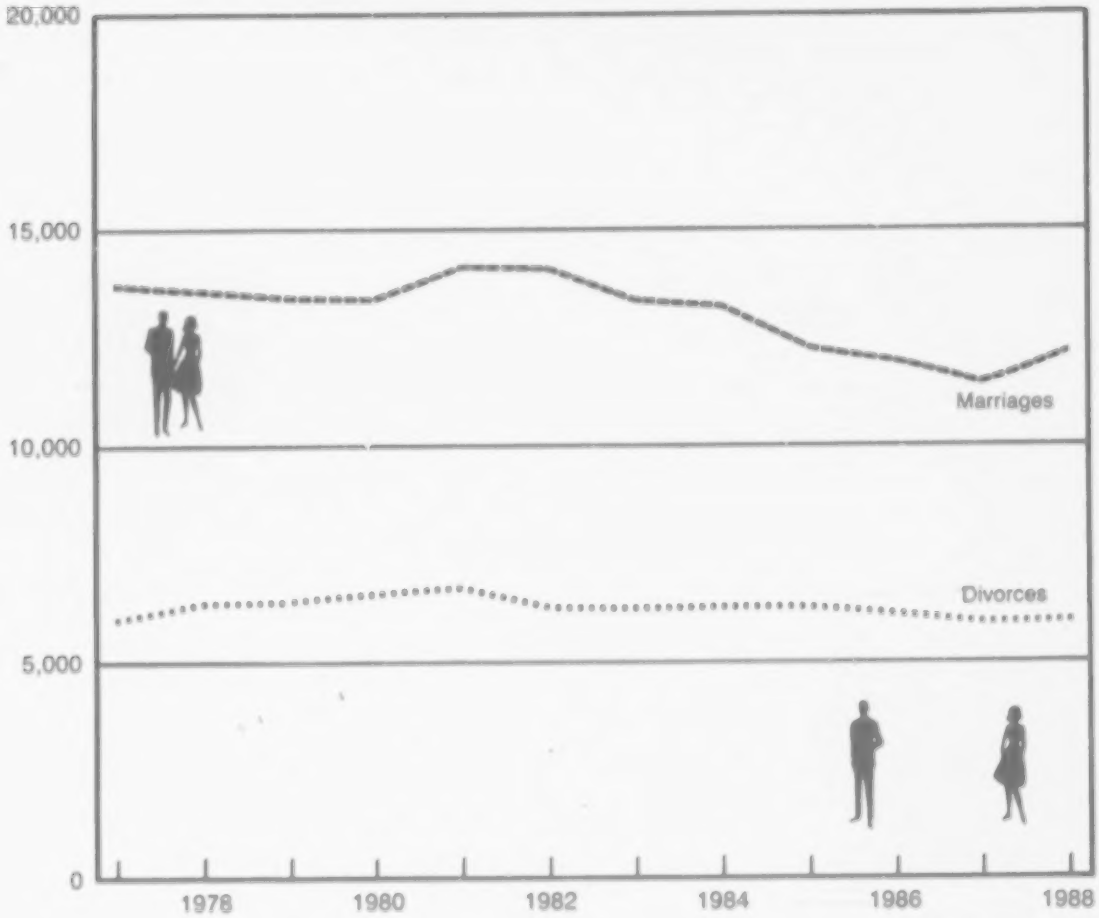
Rev. William P. Johnson

"Henry" – Saloon Keeper

Marriage is a valued institution in the black community. As happens in all populations, both positive and negative factors affect the marriage: solid family and spiritual influences enhance the chances of success, while negative factors, such as poverty and racism (which seem to be more predominant in the black population), can have destabilizing effects on marriages struggling to survive.

# MARRIAGES AND DIVORCES OCCURRING IN IDAHO

## 1977 - 1988



For the first time since 1981, both the number and rate of marriages in Idaho increased, from 11,428 (11.4) in 1987 to 12,165 (12.1) in 1988. Generally, however, there has been a decline in marriage rates in Idaho for many years; at 12.1, it is the third-lowest rate since reporting was centralized in 1947. Even so, marriages occur at a higher rate in Idaho than in the U.S. as a whole: the national rate of marriage was 9.7 in 1988 (down from 9.9 in 1987) and is the lowest rate since 1967, when it was also 9.7. The difference between Idaho and the U.S. can, however, be accounted for by the high number of non-residents who marry in north Idaho.

Divorces in Idaho also recorded the first increase in both number and rate after six consecutive annual decreases, although the changes were slight: 1988 divorces increased from 5,892 (5.9) in 1987 to 5,987 (6.0) in 1988. Divorces occur more frequently in Idaho than in the remainder of the nation: the U.S. divorce rate remained at 4.8 in 1988, the lowest national divorce rate since 1975.

# Appendix

Governor Evans signing King Day Proclamation

Surrounded by prominent Idaho citizens, then-Governor John Evans signs the proclamation of the first Martin Luther King Day in Idaho (1983). Despite problems that remain, black citizens are accepted as a vital part of the Idaho scene to a degree unimaginable 100 years ago: lower to upper-class, illiterate to educated, employed and unemployed, criminals and clergy.
